

JL269 Portable Gas Leak Detector

Brief Introduction

JL269 portable gas leak detector, with fast and stable performance and wide detecting range, is suitable for detecting about 10 types of combustible gas in the industrial environment. It can be used to detect methane, natural gases, propane, LPG, Hydrogen and other combustible gases and can help you to find the gas leaking sources easily.

Feature

- Fleetly finding the gas leakage point
- Flexible gooseneck and adjustable displaying unit
- Low voltage alert and automatic turning off function
- Sensor fault testing
- Short warm up time and response time
- Audio alarm signal with different frequency according to the gas level
- Automatic zero adjustment, easy to operate

Specifications

Sensor type: Semi-conductor gas sensor
Detecting gas: Flammable gases
Gas sampling: Natural diffusion
Response time: ≤5S
Sensitivity: Better than 50ppm
Working temperature: -10 C-55 C
Working humidity: ≤93% RH
Storage temperature: -30 C-60 C
Storage humidity: ≤93% RH
Power supply: 3.6V Ni-MH 1600mAh rechargeable battery
Charging time: 4 to 6 hours
Continuous working time: Not less than 8 hours (normal working status)
Sensor life: 2 years
Dimension and weight: 180mm×72mm×35.5mm about 300g
